

# INTERNATIONAL LIFE SCIENCES STUDENTS' CONFERENCE

7. – 11. November 2007  
in Ljubljana, Slovenia

Biotechnical Faculty  
University of Ljubljana

Today's society pays more and more attention to the development of biosciences and sustainable spatial developing; all these fields of research are commonly known as "Life Sciences". Because we feel it is important to stay in touch with the fast development of these sciences, the students of the Biotechnical Faculty have decided to organize an International Life Sciences Students' Conference.

At the conference, which will take place from November 7<sup>th</sup> to 11<sup>th</sup> at the Biotechnical Faculty in Ljubljana, students from Slovenia and abroad will be presenting their research activities to other participants. The presentations will be given in English and they will be arranged into several sections. The programme will be complemented by guided field trips and social events. At the end of the conference we plan to publish a publication which would include all the abstracts of the presentations.

By participating in a project of this kind, where the educational and the social side of the event are perfectly intermingled, students will gain new knowledge and make many new acquaintances, which may prove very useful when trying to find employment after finishing their studies. At the conference, students will gain first-hand information on current activities and development in the various fields of "Life Sciences" in various countries. They will also be given the opportunity to present quality research projects of their own to their colleagues from abroad.

Theme sections of the conference:

#### Green section

ecology, biodiversity, landscape architecture, landscape planning, forestry, conservation science, paleontology, biogeography, renewable resources, pedology, climatology, rural development ...

#### Blue section

biochemistry, biomedicine, microbiology, biotechnology, genetics, biophysics, sistem biology, immunology ...

#### Orange section

evolution, sistematics, etology, embriology, morphology, antropology, physiology, comparative anatomy, neuroscience, botany, zoology ...

#### Red section

horticulture, agronomy, zootehnics, nutrition and food science, food technology, wood processing, wood science, bioeconomy, agrotechnology ...

Anticipated time-table of the conference:

#### Wednesday, 7<sup>th</sup> November

Arrival of participants, check-in at the hotel, registration, official reception

#### Thursday, 8<sup>th</sup> November

Presentations in the morning and afternoon; intercultural get-together with presentations of the countries where the participants come from

#### Friday, 9<sup>th</sup> November

Guest lecture for all participants, guided field trips according to the desired theme section, evening party according to one's preference

#### Saturday, 10<sup>th</sup> November

Lectures in the morning and afternoon; closing ceremony, where the official recognitions for participation at the conference will be presented; party

#### Sunday, 11<sup>th</sup> November

Optional tour of Ljubljana and preparing to leave
